**TIPS  
OF THE  
TRADE**

AFM asks our favorite pros for their designing advice. When it comes to fashioning your master bathroom, **Laura Kehoe of Laura Kehoe Design** says...

**DO** invest in lighting. The proper lighting—whether it be wall sconces, a chandelier above the tub or overhead lighting—can really transform a space and set a mood for relaxation and rejuvenation.

**DO** add pattern with tile. By keeping the same material and color family, but using different sizes of tile, it adds visual interest without over-stimulating the room.

**DO** think about using a piece of furniture, like a buffet or chest of drawers, to create a unique and one-of-a-kind vanity. With all the vessel-mount sinks available, the options are endless.

**DON'T** skimp on the hardware. The small details can make a big difference. The perfect knobs or pulls are like jewelry for your vanity cabinet.

**DON'T** be afraid to use white. For a crisp and fresh approach, there is nothing better than a bright white towel or bathrobe.

**DON'T** use a color palette that is not cohesive with the master bedroom. Ideally, the rooms should not match exactly but transition well. You want to know you are in the same house.
